

headspace Adelaide and hYEPP service Preferred Provider Announcement

Key messages for all stakeholders

The tender process for **headspace** Adelaide and the hYEPP service closed on 9 November 2018 and both an internal review and an external review of applications was undertaken.

There were **six applications** received and assessed by Adelaide Primary Health Network and Orygen.

We are very pleased to announce that the preferred provider is **Sonder** and the contract negotiation period will commence shortly.

A key component of the contract negotiations will be a robust transition process which will ensure close and transparent communication and engagement with employees and private practitioners of both services and with external stakeholders.

If **headspace** employees or private practitioners have any questions or need clarity of any aspect, please contact Greg Young, Head of headspace Services Limited in the first instance.

Further communications will follow detailing employee forums and outlining the transition process and supports available.

We take this time to thank you for the ongoing work you are doing in supporting the young people of Adelaide.
